Reasons for Allowance:

The independent Claims recite canceling calls and limitations for the following:

"analyzing a plurality of inputs transmitted from a called telephone station, where the plurality of inputs are selected from the group consisting of DTMF tones, flash-hook, dial pulse input, modem/fax input, and voice input"

The prior art of record teaches canceling calls but not the plurality of inputs as recited in the limitation. New search updates revealed no other prior art which teaches the limitations in the context of the claims. Therefore, claims 1-20 are indicated allowable.
